

FINAL PROTOCOL

of the international roundtable
“Standards of Blockchain Tools”
of the Research Center of Legal Solutions
in the Area of Application of Distributed Ledger Technologies

Kyiv, Ukraine

December 11, 2019

Moderators:

Aleksandr Kud, Mykola Kucheriavenko, Yevhen Smychok

This Protocol is the final document that presents the roundtable participants’ vision of the need to establish a number of draft laws on regulation of the market of information resources, products and services based on distributed ledger technologies in Ukraine.

The international roundtable has been initiated by the non-governmental organization “Research Center of Legal Solutions in the Area of Application of Distributed Ledger Technologies” in the continuation of the panel discussion “The Future of Digital Assets: Financial and Legal Aspects” that took place on September 27, 2019 as part of the III Kharkiv International Legal Forum.

When discussing the dynamics of integration of the blockchain technology, the representatives of the scientific and business communities, as well as of the government sector of Ukraine and other countries came to the conclusion that the international market of information resources, products and services based on distributed ledger technologies currently exists. In this

connection, it is necessary to create conditions for its development. Today, the comprehensive development of this market in the world, as well as in Ukraine in particular, is complicated by the absence of a single approach to understanding the importance of integration of the blockchain technology into various areas.

Participants noted the prospect of Ukraine to become a leader in ensuring the legal regulation of such market, as well as the aspiration of the Ukrainian government to create a competitive economy through the widespread use of information technologies and blockchain in key areas of society.

In the opinion of participants, the development and integration of the legal regulation of the market of information resources, products and services based on distributed ledger technologies in Ukraine will have a positive impact on the implementation of the plan for the digitalization of society, increase in economic indicators and attraction of significant investments.

In connection with the above-mentioned, there is need to create the platform for developing the Doctrine of Economic and Legal Regulation of the Market of Information Resources, Products and Services Based on Distributed Ledger Technologies in Ukraine that may become the foundation of establishing future laws and by-laws on the basis of the Research Center of Legal Solutions in the Area of Application of Distributed Ledger Technologies.

The participants of the international roundtable have adopted the following:

1. To organize the platform for creating the Doctrine of Economic and Legal Regulation of the Market of Information Resources, Products and Services Based on Distributed Ledger Technologies in Ukraine.

2. To notify participants of opportunities and conditions for its use upon the creation of the mentioned platform.

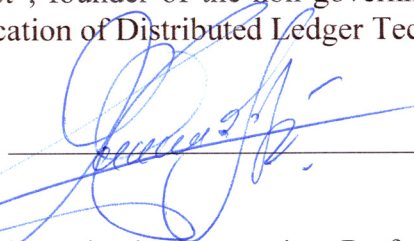

3. While drawing up the future Doctrine, to take the terminological apparatus and methods suggested in the monograph “Digital Assets and Their Economic and Legal Regulation in the Light of the Blockchain Technology Development” as a basis.

4. In April 2020, to hold a conference of the members of the Research Center of Legal Solutions in the Area of Application of Distributed Ledger Technologies in order to approve the Doctrine of Economic and Legal Regulation of the Market of Information Resources, Products and Services Based on Distributed Ledger Technologies in Ukraine.

5. Also, in April 2020, as part of the conference of the members of the Research Center of Legal Solutions in the Area of Application of Distributed Ledger Technologies and on the basis of the adopted Doctrine, to approve the development plan of the Research Center, agree on the topics and subject matters of research papers as well as distribute grants and investments, if available, among the members of the Center that will be involved in research on the development of economic and legal regulation of the market of information resources, products and services in Ukraine based on distributed ledger technologies.

Signed by:

Simcord CEO, author of the research papers “Substantiation of the Term “Digital Asset”: Economic and Legal Aspects” and “Methodology for Determining Whether a Blockchain Token Corresponds to a Digital Asset”, founder of the non-governmental organization “RC of Legal Solutions in the Area of Application of Distributed Ledger Technologies”
